

Canfit ™ Retail Last Database

- Using the **Canfit ™** Retail 3D FootScanner, Vorum has conducted extensive measurement tours in Europe, Asia and North America. The data collected from many thousands of foot scans sampled from these populations has provided Vorum with a large working database of shape information.

Significant evolution in last design

- Our last design experts analysed the current, actual foot scan data from the measurement studies and created a comprehensive new generation of lasts to accurately represent the diversity in these groups.
- New physical and digital last libraries have been developed for several types of footwear including casual, dress, golf and running shoes, hiking and cross country ski boots. Each of these libraries reflects measurement data from several thousands of foot scans.

Technical Specifications

Computer Hardware

Recommended system configuration:

- Operating System: WinXP Pro
- Memory: 2 GB RAM or more
- Hard Disk Space: 80GB hard drive with at least 5GB free for program files & data
- Modern Processor: triple core or quad core
- Name brand graphics card (nVidia GeForce or ATI Radeon) with Microsoft® Certified drivers
- No onboard graphics adapters
- Resolution: 1024 X 768 or greater
- Mouse
